Woodshop— Everyone loves woodshop! In today's age, kids usually have an excess amount of screen time. We pride ourselves on letting children work with their hands and assist them to develop the many skills associated with such activity. Many wood working skills can be incorporated into everyday lives. During our course, they learn to follow directions, expand their hand eye coordination, and improve small motor skills. Trained instructors teach students various techniques and abilities, including how to safely cut, glue, and sand wood. We do encourage all students to take pride in "thinking outside the box" and add their own touches to each project, to make it one of a kind. The sense of accomplishment children will feel after building each project is priceless
