transportation picks up from: Mariposa, Sumac, Willow, Yerba Buena Elementary Schools

5TH GRADE TRANSPORTATION

Financial scholarships are available for families who qualify. See your Club director for an application and more information. Pending financial aid approval, all program fees are due prior to your child’s attendance.
Youth have broad and diverse dreams and interests, and that is why we offer an incredible selection of custom-designed, local Club programming. Through this programming, our Club members have access to daily programs where they can find new interests, explore various activities, and dive deeper into their passions. These daily programs drive positive outcomes and establish the necessary life skills our youths need to succeed into adulthood.

PROGRAM DESCRIPTIONS

Classes are offered at **NO ADDITIONAL CHARGE** when monthly members are enrolled in the after-school program. Non-monthly members are welcome to enroll in these programs on an “à la carte” (pay as you go) basis.

The 10 Day Pass/Lucky Day Pass may not be used for classes.

Cost per class for a non-monthly member is $100, unless otherwise noted.

* These classes have an additional cost for monthly and non-monthly members.

^ Classes can only be attended by after-school monthly members.

**3D PRINTING** We will spend the full eight weeks learning how to design models on various websites and operate a 3D printer, in addition to exploring the science behind the 3D printing machines.

**AMAZING ART** We will study the fundamentals of line drawing, perspective, color, and texture.

**ART—LEARNING THE MASTERS** This course will be part history, part art. Members will learn about famous artists through history and their most iconic artworks and then complete projects in which they recreate them with their own twist.

**ART PAINTING** Step-by-step instructions on painting landscapes, objects, portraits, and abstracts, allowing members to finish a new piece each session.

**ASTROLOGY** We will study everything in the universe beyond Earth’s atmosphere, including objects we can see with our naked eyes, like the sun, the moon, the planets, and the stars. We will also explore things we can only see with telescopes or other instruments, such as faraway galaxies and tiny particles.

**BASKETBALL** Members can learn and improve their shooting, rebounding, passing, dribbling, and conditioning skills.

**CODING** Members will learn basic programming skills that will allow them to master the computer. Coding is the language of the future, and members will build these critical skills to ensure their future success.

**COOL GUYS** This course promotes and teaches responsibility while reinforcing positive behavior in male Club members. Members will engage in a personal growth journey using interactive activities that focus on the various aspects of character development.

* **CSI FORENSICS** Participants will discover the world of forensic science and crime scene investigations while learning from experts in the field. You will become a crime scene investigator, discovering the nature and importance of physical evidence in solving crimes. Learn how to collect, process, and analyze different types of physical evidence.
  - $90 Monthly Members
  - $140 Non-Monthly Members

* **CREATIVE COOKING** Learn simple cooking techniques using basic kitchen appliances. This is an excellent course for those who love to cook! The best part... participants get to eat what they make!
  - $75 Monthly Members
  - $125 Non-Monthly Members

**DIGITAL AND PHOTO EDITING** Members will use professional editing programs to manipulate images and learn some of the basic concepts of graphic design, like merging images, cropping or hiding unwanted features, and much more!
EXPLORE MORE PROGRAMS & REGISTER
FOR 2022-2023 SCHOOL YEAR AT BGCCONEJO.ORG

DIY ART This creative class will open students up to new ideas on how to make something simple into a fun activity. We use everyday supplies and turn them into inventive projects.

DIY CLUB In this course, members will do several craft activities in which they repurpose everyday items (or what some might call “trash”) into beautiful and functional things.

DIY STEAM Explore science, technology, engineering, art, and math with a wide range of hands-on activities.

DRAMA CLUB This class introduces improvisation and ensemble acting skills through participatory activities and individual character development. Students will gain confidence, speaking skills, and self-esteem by learning to perform in front of a live audience. Sessions will end with a performance.

EDIBLE STEAM Join this fun class to enjoy cooking, art, and STEAM, or combine them all!

EINSTEIN SCIENCE Members can explore their love for the stars, oceans, and chemical physics by using logic and their imagination. Members become scientists in whichever field their heart desires! Let’s do some science projects!

FLAG FOOTBALL This program is designed to cover the basics: passing, receiving, running with the ball, blocking, and defense. Participants will be provided with fun opportunities to exercise their newly acquired skills.

GUIDED DRAWING Members develop drawing skills through guided step-by-step techniques to create characters, places, and things while building their confidence in their talent. This course also promotes creativity by encouraging members to add their own twist to their artwork.

HEALTHY HABITS This program focuses on helping youth make healthy eating choices. The program consists of 14 progressive, interactive, practical activities that develop young people’s skills, confidence, and motivation to make healthy nutritional choices throughout their lives.

INTRODUCTORY MUSIC This enrichment program introduces music to music, melody and rhythm in an interactive and fun environment through rhythm-based exercises, sing-along elements, and movement, all while focusing on listening skills and using instruments.

IMPROVISATION This class introduces improvisation and ensemble acting skills through participatory activities and individual character development. Students build self-confidence and feel more comfortable being in front of groups while learning to think on their feet.

JR. LEADERS Members will build their leadership skills by helping with Club projects, plans, events, and activities. This provides our members with an opportunity to gain teamwork experience and responsibility.

LAB RATS Students can grab their safety glasses and lab coats for this program! Members will have the opportunity to perform messy experiments, work in groups, and learn and try new experiments until one works!

LYRISISM 101 This program will allow members to explore hip-hop as an art form and engage in critical literacy and creative writing. Lyrisism will build self-esteem and confidence while celebrating the diverse identities of our members.

MAD SCIENCE This program is great for members who enjoy creating experiments and watching science come to life. Each week, members will work on creative hands-on science projects and experiments.

MESSY SCIENCE Learn scientific principles while making messy slime, elephant toothpaste, exploding watermelons, and more!

MEDIA MAKING This program teaches creative expression by engaging members in experiencing, creating, sharing, and editing digital media. Our project-based activities introduce members to photography, audio production, video production, and design. Envisioning and developing projects allows members to hone their creativity, collaboration, communication, and critical-thinking skills.

MURAL PAINTING Members can unleash their inner artist and help create amazing murals to decorate the Club. Members will work together as a team to design and paint the interior hallways, making a lasting mark on the Club.
PERFORMING ARTS In this course, members can develop creative passions while learning language and effective communication skills. Members explore their individuality and self-expression through the performing arts!

PICASSO ART Members are inspired by Picasso's paintings, drawings, sculptures, ceramics, and more! Members will have the opportunity to learn new techniques using pencils, paper, and other art supplies.

SCIENCE EXPLOSION Conduct simple scientific experiments with objects found in and around the Club. Some of the many experiments include elephant toothpaste and rockets!

SCIENCE FAIR This program is perfect for students who enjoy building things and bringing their ideas to life! Club members will have the opportunity to develop their projects step-by-step and demonstrate them to the rest of the members.

SCRATCH PROGRAMMING Members will have the opportunity to create their own interactive stories, games, and animations while they learn to think creatively, reason systematically, and work collaboratively.

SIGN LANGUAGE Members will have fun learning sign language basics, including finger spelling, vocabulary, and sentences.

STEAM COOKING Students learn the science and culture behind some of their favorite foods. We will explore the different techniques of preparing, cooking, and eating various foods from around the world.

$75 Monthly Members
$125 Non-Monthly Members

SMART GIRLS This is a health, fitness, prevention, education, and self-esteem enhancement program. This popular program is designed to encourage healthy attitudes and lifestyles.

SMART MOVES In a positive environment and group setting, members can discuss any worries they may have with their peers. Members will learn healthy habits, fitness skills, prevention techniques, and ways to enhance their self-esteem.

TORCH CLUB This small-group leadership development program is targeted at building future leaders. Members elect officers and plan and implement their own activities and community service projects.

WEIRD SCIENCE In a series of short, easy, and sometimes “weird” demonstrations and ideas, this program incorporates hands-on experiments. Your imagination will be put to use as you discover a new world using everyday items.

YOGA MEDITATION This is a great program for students who are stressed about homework, school, or responsibilities. We help members find their zen through various types of relaxation and concentration techniques using meditation and yoga.

YOUTH FOR UNITY This group is perfect for students looking to express their individuality and uniqueness! We provide opportunities to explore the various aspects of their identity. We will also address and critique stereotypes and biases regarding identity and culture. Each week, we will invite a panel speaker to share their story and answer the audience’s questions.
Spend more quality time with your child by enrolling them in our after-school Power Hour program for homework help!

Watch your children gain scholastic confidence by completing their homework on time, with additional help when they need it. Experience peace of mind knowing your children can complete their homework in a safe and welcoming space with our Club staff on hand to help in all subjects.

Offered at all Club locations! Ask your Club for details!  
Register online: bgcconejo.org

There is no additional cost for our after-school monthly members!

This program can only be attended by after-school monthly members.
Every donor is important to us.

As investors, we appreciate your faith in our work, and we thank you for believing in the potential of our kids!

Every dollar we raise and every hour someone invests in our members is used strategically to improve lives.

We appreciate all you do, and we sincerely thank you for your support.
